## Welcome to Canton Car Wash

We created this book to show you what we can do for you and your car – get it squeaky green and rejuvenated, inside and out. Our team has the skills and the tenacity to take on your toughest problems, which is why we detail more vehicles than any other business in the region, and have more satisfied customers to prove it.

Whether you are about to sell or plan to hold on to your car for a while, these services can help revive the vehicle and recoup significant value. Take a look at what we can do, and ask any member of our management team how Canton Car Wash can best serve your vehicle today!

# BE SMART.

Take advantage of our loaner Smart car when purchasing a Full Combo detail – for no additional cost. Instead of waiting while we detail your car you can use our very own Smart car and spend your time however you want.

Reserve the car online, over the phone or in person when making an appointment.

# Express Detailing

# EXPRESS YOURSELF.

## Express Detail

### Problem:

A grimy car, inside and out. You know you need much more than just a straight car wash, but you're not up for a full detail.

### Fix:

We'll make quick work of the dirt, dust, grub & grit and have you sparkling inside and out. We hit the grime hard with a powerful combination of our three best services: our Platinum Exterior Wash, our Express Wax & and our Express Interior clean.

We start off with our Platinum Exterior Wash, bubbling the dirt away, and finishing with an Undercarriage Rinse, followed by Rain Shield and Tire Shine. Then we move onto the Express Interior. We blow compressed air into all the nooks and crannies to release trapped dust and debris. Then follow with a thorough wipe down and disinfection of all hard surfaces, finally removing any remaining dust and dirt with a complete vacuum. To add a final layer of protection, we finish up with our Express Wax, which contains polish to really make the paint pop.

It takes 30-45 minutes to provide what is easily one of our best offerings.

# GLISTEN UP.

## Express Wax

### Problem:

It's a harsh world out there for the exterior of your car. From contaminants in rain, to UV rays from the sun, to other insults like bird droppings, your finish can end up looking dull and damaged.

### Fix:

We go for full-on protection. Our wax has a micro-beading formula and paint sealant that creates a defensive barrier against these daily assaults to protect your clear coat. We apply the wax, which also contains a polish, to every inch of your paint, leaving an extraordinary level of gloss and silk finish. And we do it all in no time flat – 20 minutes or less (in addition to whatever wash you select).

To get the proper results, the exterior of the vehicle must be completely clean. That makes a Full or Exterior Wash (purchased separately) a must.

# Express Wax

# AN INSIDE JOB.

## Express Interior

### Problem:

Dirty, dusty, sticky, icky – no matter how you describe it, your interior needs a complete cleaning.

### Fix:

We scrub, rub, blow out and wipe off all of the hard surfaces inside your car, cleaning them – all in under 20 minutes! First we use our compressed air guns to blast away debris stuck between your seats, in your air vents and any other pesky areas that you just can't get to without the right tools. We then meticulously clean and disinfect all the hard surfaces and vacuum throughout, leaving your car sparkling clean.

# LOVE YOUR LEATHER.

## Express Leather Seats

### Problem:

Your leather is being ignored – even mistreated – and you won't stand for it for one more minute. To fight off discoloration, cracking and premature aging, your seats need TLC, pronto!

### Fix:

This is a time to go gentle. With Zen music playing in the background, aromatherapy in the air, we carefully apply our favorite cleaner with a special brush, softly agitating the surfaces to encourage the release of the dirt and oils. We then wipe them away with a soft cloth and condition the seats with a moisturizing cream that protects your leather from future discoloration and cracking – all in less than 20 minutes.

Express Leather Seats requires a Full Service Wash.

# Express Leather Seats

SHINE ON!

## Rim Detail

### Problem:

All cars create brake dust – some more than others. It not only makes your rims look bad but it can also corrode them and cause rust to form.

### Fix:

We apply a solution that makes anything stuck to the rims fall away. Once clean, we go karate kid on the rim – wax on, wax off – which protects the surface from future brake dust.

# Full Detailing

# GO DEEP.

## Full Interior Detail

### Problem:

Give us your major stains, your loose dirt, your toughest grime just yearning to be cleaned. When a wipe down won't do it, our deepest interior clean will. Get your car sparkling, from mats to visors, from center console to door panels, and everything in between.

### Fix:

We out-stubborn the grime throughout the interior. First, we use compressed air to blow dirt out from where it hides – in crevices and under seats – and get it all up and out of your car with powerful vacuums. Then we shampoo the entire car including the trunk/back area. Our extracting machines shoot hot soapy water into cloth and suck the stain right out of the seat, carpet or mat. Leather is scrubbed down and given a leather conditioner. After all this, we scrub, then wipe down all of the hard surfaces to completely defeat the grime. To finish it all up we wipe the door jams out and clean all of the windows inside and out.

Full Interior Detail 

# FALL (BACK) IN LOVE WITH YOUR CAR.

## Full Exterior Detail

### Problem:

Scratches? Blemishes? Other imperfections? The clear coat – the protective layer that sits on top of the paint – takes a beating from things like bird droppings, mashed insects, fallen berries and even acid rain. Tree sap can bond to a clear coat so well it can cause damage. Ignore the problem too long and these things will cause permanent damage to your paint as well.

### Fix:

We give it everything we've got. Our 4-step process will help restore your car's original shine and luster. Then we top it off with a Rim Detail.

#### 1. Clay Bar

We remove grit and restore a glass-like finish.

#### 2. Compound

We buff out small blemishes, scratches and imperfections in the clear coat.

#### 3. Polish

We bring back the shine of the painted surfaces so that the color just pops.

#### 4. Wax

We protect all of the above work with a coat of our best wax.

Full Exterior Detail 

# BEAUTIFUL, INSIDE AND OUT.

## Full Detail Combo

### Problem:

We take on your toughest troubles and make them disappear. On the inside, stains in need of extraction and debris in need of removal. Outside: scratches, oxidation and stains from berries, bird droppings and tree sap eating into the clear coat.

### Fix:

We mix our Full Exterior and Full Interior Details to create our fullest clean at our best value. You get a full detail inside and out and save some green compared to buying the services individually. Your car is left beautiful inside and out.

PUT SOME  
SPARKLE  
BACK  
IN YOUR  
LIFE.

## Full Clay and Wax

### Problem:

Sometimes in life, things get a little sticky. Berries and tree sap can stick to and ruin your clear coat. Overspray, whether from paint, graffiti, soot, cement, concrete splatters – you name it – will make your car look and feel dull and rough. On a white car, this can cause tiny rust spots to appear. Even the best car wash tunnel (like ours) is no match for the tenacity of these pests. It takes a detail and – our best weapon – a clay bar.

### Fix:

A clay bar, a lubricant and a proprietary blend of elbow grease allows us to lift overspray and other spots right off of your car. We rub the clay bar over the entire car once, and if needed, we do it again. After this we wash and dry the outside of the car to extract all of the dirt and grime from the clear coat and make it extremely smooth. Then we apply two coats of paste wax (with polish) to protect the paint and bring out the full shine.

Full Clay and Wax 

# Add Ons

# BALD IS BEAUTIFUL.

## Pet Hair Removal

### Problem:

Fluffy loves the car, and so does her shedded hair. It sticks to carpets, seats and mats and is nearly impossible to vacuum or sticky roll away. The more you vacuum, the more it appears.

### Fix:

We blow out the loose pet hair & vacuum it up. For the remaining hair stuck in the seats, mat and carpet, we use pet hair removal tools and a lot of patience. Finally, we vacuum again, to ensure that no hair remains in the vehicle.

Very efficient and fast!

**James F says:** I had the outside and inside of my SUV done and I must say it looks brand new as if I drove it off the dealer lot.

My car looks brand new!

**Lisa O says:** Honestly... if you plan to sell your car and want it to absolutely look showroom new, spend the money and get the full detail package. The car is beautiful! Thanks!

A cut above the rest!

**Luke M says:** This was my first time at Canton Car Wash. I've been to several car washes in Baltimore and this has been the best ever. I got my vehicle fully detailed in and out and they nailed it!

Canton Car Wash was started by three young Baltimore residents frustrated with the lack of quality car washing facilities in their beloved city. Their vehicles were constantly under attack by pigeons, grime, pollen, salt and other less-than-charming aspects of Charm City.

Washing a car in front of a row home was hardly an option given you had to be to be lucky enough to get a parking spot - not to mention hardly any row homes have faucets outside Hon. Existing car wash facilities set the bar way too low. Grumpy employees, dirty facilities and lost valuables were part of the price you paid for only a semi-clean car.

The Canton Car Wash owners wanted more for their city and their neighbors. Here, the experience is just as important as the actual wash. With the coffee bar, free WiFi, unlimited memberships, amazing employees, and of course a wash that is squeaky green, everything is created to give CCW customers the best in all areas.
